

Material Handler

April 10, 2017

Position Overview

At S3 Manufacturing, the Material Handler is responsible for storing, moving, handling and providing raw materials to production as required. The Material Handler identifies, transports, packages, and disposes of materials safely.

Some of the Material Handler responsibilities include:

- Conducting and recording daily safety and maintenance checks for equipment
- Picking materials to fill production workstations
- Receiving, verifying, inventorying and monitoring materials
- Maintaining good housekeeping
- Meeting internal customer needs with the required product

The successful candidate will possess strong organizational and problem solving skills and will be capable of responding quickly to the ever-changing needs of production. In addition, the Materials Handler will require these skills and abilities:

- Grade 12 Diploma, or equivalent
- Experience in material handling, or previous comparable job experience
- Competent and Certified in the safe operation of a forklift and other material handling equipment
- Ability to measure and record information accurately
- Proficient with Microsoft Outlook, Word, and Excel programs
- Capable of adapting to and learning new software applications
- Above average math skills
- Positive and cooperative team player
- Capable of working with minimal supervision
- Ability to communicate effectively

Why work with us?

- Competitive salary
- Comprehensive benefits package
- RRSP matching and bonus programs
- Educational & health allowances
- Advancement opportunities
- Challenging, respectful work environment
