S3 Enterprises Announces the S3 Legacy Project

S3 Enterprises, a shortline farm equipment manufacturer located in Swift Current, SK, announced the release of the S3 Legacy Project on December 1, 2020 through its social media accounts.

In a world where people care about how their food is produced, the S3 Legacy Project logo helps consumers identify products, services, and best practices that contribute to agricultural stewardship.

The S3 Legacy Project recognizes the Five Pillars of Agricultural Stewardship:

1. Reducing energy consumption
2. Improving soil health
3. Safeguarding clean water
4. Reusing what is already there
5. Reducing waste

“The S3 Legacy Project recognizes the incremental improvements in farm practice and manufacturing that contribute to sustainable farms supported by sustainable farm equipment manufacturing. Positive, long-term results come from doing the best you can as often as you can. The S3 Legacy Project celebrates those continuous improvements along the way,” comments S3 Enterprises CEO, Richelle Andreas.

As part of the S3 family of companies, S3 Enterprises brings decades of experience in shortline farm equipment manufacturing. For more information about S3, visit www.S3enterprises.com.
